ABOUT ME

Experienced Full Stack Software Engineer with a demonstrated history of working in the information technology and services industry.

I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me.

WORK EXPERIENCE

AUG 2019 **SOFTWARE ENGINEER**
APR 2020 *Andela Rwanda | Kigali*

While At Andela I had the chance to use various technologies and Stacks:

- I worked on a project, A platform for making company travel and accommodation easy and convenient. I contributed using NodeJS/Express on the backend and React on the frontend.
- I worked on an internal product that provides trip management support. On this project, I contributed using NodeJS/Typescript on the backend and Angular on the frontend. Not only these two but I had to interact with technologies like Slack API, Google maps API and caching services.
- As a developer at Andela, I always had to also deal with DevOps that is Travis and Circle CI for Continuous Integration and Docker, Heroku for deployment.

DEC 2018 **FULL STACK WEB DEVELOPER**
JUL 2019 *Farmpal Ltd | Kigali*

I worked as the only developer to implement this platform. FarmPal is a digital agriculture platform linking farmers and investors. it enables people to invest in agricultural projects of their choice, earn a profit while empowering farmers.

- I implemented this platform with Laravel PHP and blade templating.
- I integrated online payment services like Paypal API and MTN mobile money services.
- I deployed this web application on an NGINX server.

FREELANCER
N/A

I am a part-time freelancer on and off Upwork and during that time I've worked on some clients Projects.

Here is one of them:

- JL Company: a company website that illustrates company activities
